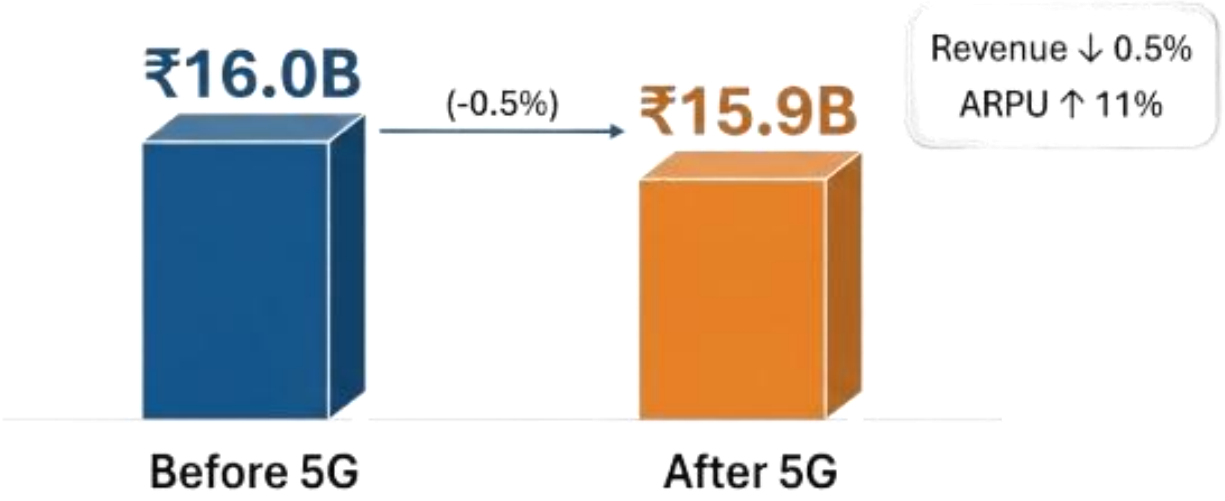
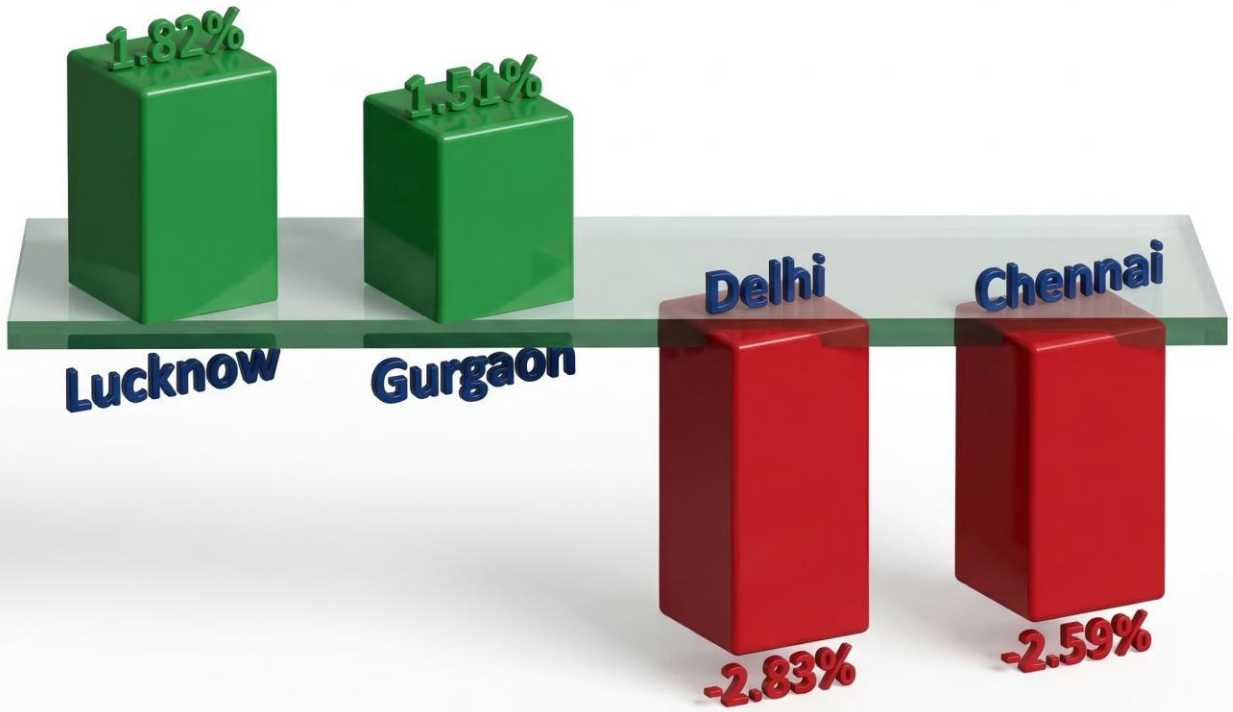
Revenue Stagnation



Revenue stagnation driven by user decline despite ARPU growth

- While overall revenue declined, ARPU increased by 11%.
- ARPU growth: ₹190 (Pre-5G) → ₹211 (Post-5G)

City-Level Revenue Growth Post-5G



Growth is seen in emerging cities like Lucknow and Gurgaon,
but major metros like Delhi and Chennai show decline.
This indicates uneven adoption and possible service or pricing issues in key markets.

Retention Crisis

Total Active Users (TAU) have decreased by 8.28%,
with a corresponding increase in churn of 23.5%.
This combined effect requires immediate service retention analysis.

BUSINESS IMPLICATIONS

1) Price Sensitivity
2) Network Gaps
3) Forced Migration

Shift to Data Economy

Old Model (Before 5G)

- ✓ Voice-first plans
- ✓ Low data usage
- ✓ Talktime driven

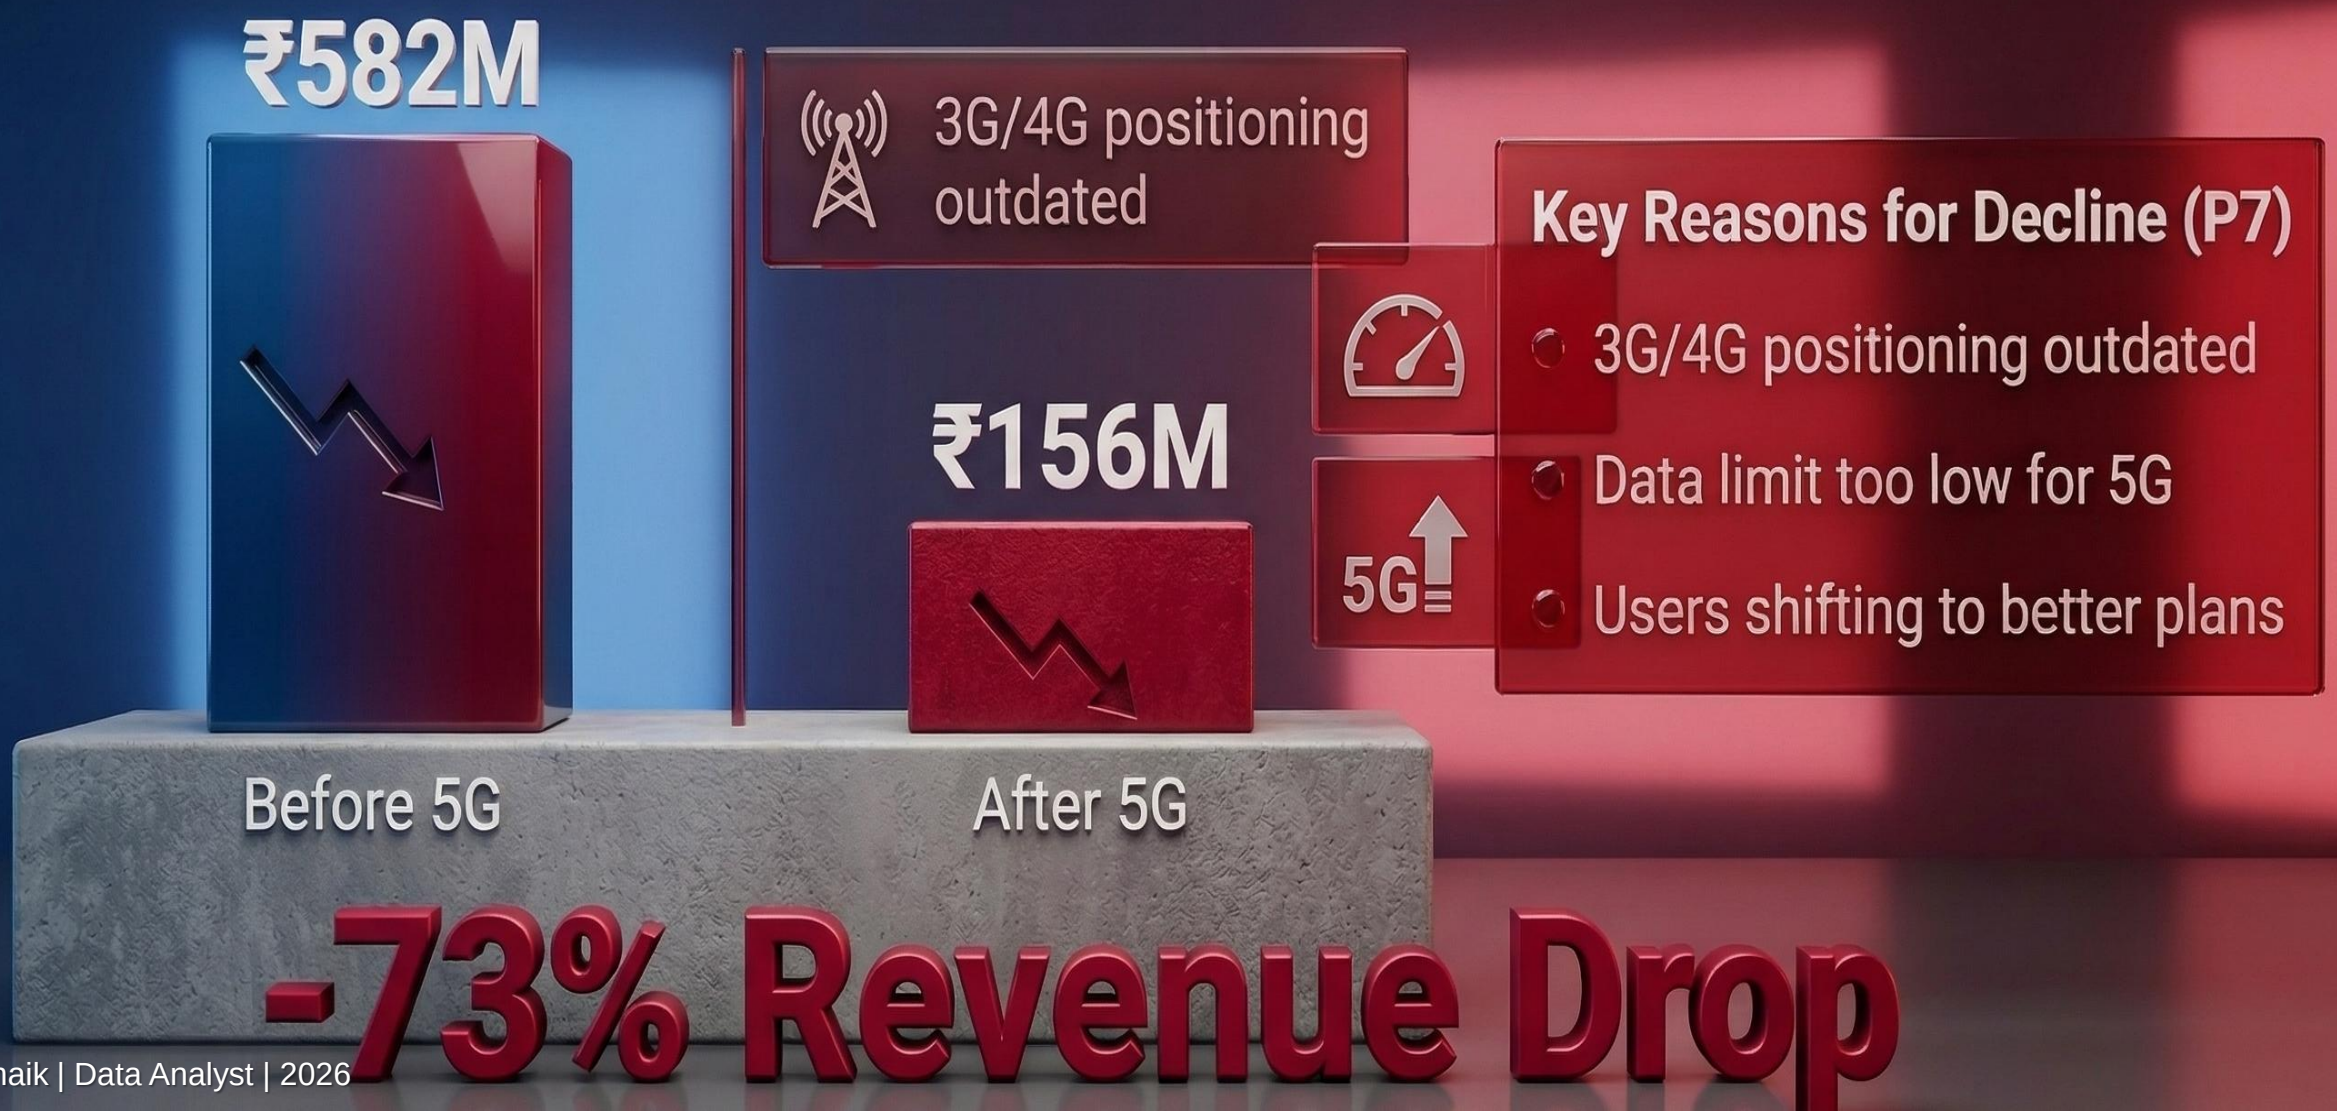
New Model (After 5G)

- ✓ Data-first plans
- ✓ High consumption
- ✓ Unlimited usage

Customer preference has shifted from talktime to data consumption

Customer Shift: Talk Time to Data Consumption

Product Obsolescence



FORCED MIGRATION BACKFIRED

Discontinued Plans: P8, P9, P10

- Removed post 5G launch
- Zero revenue contribution

Strategy Intent

- Push users toward 5G plans
- Increase ARPU
- Simplify product portfolio

CRITICAL IMPACT

CHURN ↑ 23.5%

Users exited instead of upgrading

"Removing budget plans led to customer loss instead of upgrade"
